

## Virtual Computer Lab – Desktop Software Catalog

The [NOVA Virtual Lab](#) provides students access to Windows 11 desktops with frequently used student software which is available at onsite campus computer labs. Students can access the Virtual Lab 24x7 from any Windows, Mac OS, or iOS device with a high-speed Internet connection.

### Important Notes

- As with a traditional Computer Lab, there are a limited number of available seats. As a courtesy, you should try to limit your time on the virtual applications to allow other students an opportunity to use the software.
- Once you close an application, there is an automatic 15-minute idle timeout feature to release the session to another student.
- The virtual desktops reset after each session and your data cannot be saved to the virtual computer lab environment. You need to **SAVE** your work early and often using your local hard drive or an external storage device (e.g., thumb drive/USB key) or cloud storage solutions like Google Drive or Microsoft OneDrive.
- Software availability is subject to change.
- Best to use Google Chrome browser to receive best experience with Citrix Workspace App.
